INTRODUCTION

The Town of Nantucket (Town) continues to recognize that procurement, construction, and maintenance of its capital assets are critical activities essential to its future fiscal health and the appropriate delivery of services to citizens and businesses. Arising therefrom, the primary objective of Capital Program Committee (CapCom) is to develop, carefully plan, and to maintain a comprehensive Capital Improvement Plan (CIP) that promotes stability and stewardship. The foregoing and all aspects of this report that follow are per revisions to Town Financial Policies & Procedures (FP&P) adopted by the Select Board, November 16, 2016. The FP&P represent a best practice requirement of the Town to participate in, and benefit from, the Massachusetts Community Compact program.

This report is the culmination of many dedicated hours of the CapCom, our Town Manager & Administration, the Finance Department, Department Heads, and others. CapCom is grateful for their ongoing assistance—appropriate development and success of the CIP depends on each of these efforts and objective professionalism—we take this opportunity to thank all involved for their timely contributions.

Respectfully, the Town of Nantucket Capital Program Committee:

Chairman, At-large – Stephen Welch Vice Chairman, At-large – Peter Kaizer Secretary, At-large – Richard Hussey Board of Selectmen Representative – Jason Bridges Finance Committee Representative – Peter McEachern Member-At-Large Representative – Christy Kickham, NP&EDC Representative – Nathanial Lowell

January 23, 2020 Page 1 of 12

For Fiscal Year 2021 (FY21), of 67 requests totaling \$52.94M, the Capital Program Committee recommends capital allocations for 59 requests totaling \$42.28M; all values are shown in millions (M).

GENERAL FUND & ENTERPRISE ACCOUNT TOTALS: \$42.28M

GENERAL FUND (BY DEPARTMENT)

Dept. Public Works (DPW)	
Facilities	\$1.50M
General	\$.85M
Transportation	\$10.89M
Fire Dept.	\$.20M
IS/GIS	\$.24M
Marine	\$.15M
Police	\$.50M
School	\$1.57M
Town Administration	\$4.15M

ENTERPRISE ACCOUNTS

Airport	\$8.08M
Sewer	\$12.00M
Solid Waste	\$1.06M
Wannacomet Water Company	\$1.10M

Enterprise Accounts Total: \$22.24M

General Fund Total:

\$20.04M

FY21 REQUESTS ≥ \$1M (BY ACCOUNT)

Shown are capital requests of greater than or equal to \$1M, by Fund-type, keyed to each request's Project Code:

GENERAL FUND

ADMIN	Children's Beach Storm Water Pump (HMP ID #F9)	\$3.30M
DPW-TRANS	Newtown Rd. Imprv. (Select Board Strategic Plan (SB SP))	\$1.15M
DPW-TRANS	Sidewalk Improvement Plan (SB SP)	\$1.03M
DPW-TRANS	Surfside Road Area: Phase II - Lovers Lane Improvements	\$3.27M
DPW-TRANS	Waitt Drive (6FG)/Amelia Drive	\$3.72M

ENTERPRISE ACCOUNTS

AIRPORT	Airport Improvement Program (AIP) Projects	\$6.12M
AIRPORT	Fuel Farm Rehabilitation - Suppl. Request1	\$1.06M
SEWER	108-120 Baxter Rd. Sewer Design/Const. (Phase 1)	\$2.00M
SEWER	Airport Rd Pump Station Upgrades	\$1.00M
SEWER	South Shore Road Sewer	\$1.50M
SEWER	Surfside Roads Area Sewer Improvements (Phase 1)	\$2.00M
SEWER	Surfside WWTF Membrane Upgrades	\$4.00M
WATER	Water Main Replacement	\$1.10M

Waitt & Amelia Drive (Supplemental)	Debt	\$ 0.0111	\$	3.46	\$ 0.0200	\$	5.88	\$ 0.0080	\$	3.30
	Totals:	\$ 0.0817	\$	3.53	\$ 0.1440	\$	6.00	\$ 0.0647	\$	3.35

Assumptions:

- Assumptions are based on FY20 approved values and tax rates using a shift of 1.70 and Residential Exemption of 25%
- FY20 Residential Tax Rate is \$3.45 per thousand.
- FY20 Commercial Tax Rate is \$5.86 per thousand
- FY20 Open Space Rate is \$3.29 per thousand
- CIP=Commercial, Ind. & Personal Property. \$2M was selected as the benchmark assessment for commercial properties
- Principal and Interest charges are based on 4% over $20\,\mbox{years}$

Notes

- $\hbox{- The true average commercial property value is $1,520,366}. \ Most of the resort and retail parcels are mixed use$
- There are currently 17 properties classified as Open Space. Their average value is \$118,682
- Nantucket has not adopted an "Open Space Discount"; difference between Open Space & Res. is the cost of the Res. Exemption
- ¹ = For specific Requests, see Appendix B Capital Requests by Funding Source, General Fund/Capital Exclusions

See too: "Appendix D - Town of Nantucket Tax Rate History"

ENTERPRISE ACCOUNTS - RATEPAYER IMPACTS

<u>Water & Sewer</u>: To set revenue requirements resulting in a rate schedule adequate for its needs, the Wannacomet Water Co. Commission has undertaken a review of costs for ongoing operations, existing and anticipated capital improvements, and anticipated necessary reserves. Modifications to rate schedule, through a public hearing process, are not yet complete. Latest posted Wannacomet rate activity is found here: https://tinyurl.com/yb7p7gm9. The foregoing is generally accurate for the Town of Nantucket Sewer Dept., through the Town of Nantucket Sewer Commission. A tiered rate structure, to more equitably generate revenue for account obligations is under development; in the interim, temporary rates have been established—see: https://tinyurl.com/y52a5wp.

<u>Airport</u>: The Nantucket Memorial Airport pays its obligations from operating revenue derived from a rate schedule of fees and charges for aeronautical, non-aeronautical, ground transportation, advertising, and other services; its rate schedule is determined by the Nantucket Memorial Airport Commission through a public hearing process. Borrowings authorized (other than for AIP Projects) are typically funded under Bond Anticipation Notes (BANs), which are paid off by certified Retained Earnings. Latest posted rate activity is found here: https://tinyurl.com/yd57ex8z.

CAPITAL PROGRAM COMMITTEE: FY21 REPORT & RECOMMENDATIONS (FINAL)

At the time of this report, General Fund and Enterprise Accounts Amortization Tables were not available in printable form. As of their availability, a revision to this page will provide weblinks to the tables.

CAPITAL PROGRAM COMMITTEE: FY21 REPORT & RECOMMENDATIONS (FINAL)

STATEMENT OF PROCEDURES

To address its mandate (https://tinyurl.com/uj95b7t), which is to help guide the Town's capital-related investments and objectives, CapCom maintains certain procedures and undertakes various initiatives. CapCom also conducts an annual self-examination of related matters. Of note at this time:

- Capital Project Request Forms. CapCom starts its review process collecting and evaluating comprehensive capital project request forms required of department heads for each capital request. For various utility, by design, form data is entered directly to a relational database; CapCom accesses this information in a secure online environment. After evaluating forms for completeness, CapCom hosts department heads and our Town Manager and Finance Director for in-depth Q&A sessions; supplemental information, requested as applicable, is often provided to help complete CapCom's analysis and evaluation.
- *Prioritization & Ranking.* After comprehensive analysis and evaluation, CapCom prioritizes and ranks each fiscal year capital request:
 - For integrity of process, linking community needs and goals (e.g. service objectives, health and regulatory requirements, and strategic and master plans) and a transparent, unbiased methodology are required.
 - To help address this task, CapCom designed and deployed an Analytical Hierarchy Process (AHP) framework keyed to the Town's FP&P criteria; AHP establishes a comprehensive, rational framework and systematizes valuation and application of multiple, diverse criterion, incorporating the diversity of members' expertise while smoothing subjectivity; wildly oversimplified, it is a mathematically-based, human and social science-informed, blind judging framework. As a result of its use and application, each request is subject to a single set of objective review standards and analyzed in the context of community-wide needs. Use of the worksheet produces a numerical Rank of Relative Importance (RORI) per request, which rankings inform CapCom deliberations. Perhaps of interest—not every criterion (and its respective value) applies to every request, and as a result, a RORI value of "80" is actually quite high.
 - Expansion of the RORI (to include financial and social impacts, risk-management variables, Total Cost concepts, and others) and developing its use (to better incorporate criteria of the FP&P, in CapCom and other Town evaluations) are necessary to meet FP&P objectives and better align the Town's capital investment with community goals.

Note: Subject to funding availability and deliverability within the upcoming fiscal year, higher-valued RORI requests are typically recommended for funding; lower-valued RORI requests are typically moved into the Town's 10-year CIP; whenever reliable cost-forecasting is available, that cost is included in the 10-Year CIP and in the alternative, more often than not, order of magnitude placeholder-values are often requested.

• Annual Timeline & Related:

- In early summer, CapCom begins its capital budgeting cycle. Due to the volume of capital requests and often the complexity and high costs of requests, CapCom's preparation and review (including to incorporate its broader charge) require weekly

Page 7 of 12

January 23, 2020

STATEMENT OF PROCEDURES

- meetings spanning more than half a year—it is fair to state the process is intensive, and more so for a volunteer core. Though no longer community-televised, meetings are open to the public and municipal employees. On subject matter, it's typically dry and no public attends; however, for informational purposes the Town Manager periodically provides Capital Program updates to the Select Board during its regular meetings, and through this televised forum, to the interested public.
- In recent years, facing larger and larger funding requirements and consistent with the FP&P, *CapCom requires and includes reasonably accurate funding sources and tax impacts in its annual report*—this information is included in the report wherever relevant to form a basis of general understanding.
- In mid-December—to facilitate the planning of funding sources for its recommendations and as a material update to the Select Board and FinCom—CapCom broadcasts its up/down fiscal year recommendations through the Town Manager and Finance Director.
- In early-mid January, as a function of other budgetary matters, potential funding sources are identified by the Town's Finance Director and Town Manager; shortly thereafter, CapCom meets to review, discuss, and vote its recommendation on funding sources and to reconcile discrepancies, if any, with the Town Manager.
- In mid-January, after the Select Board preliminarily adopts capital funding sources, tax rate impacts are tallied for inclusion in the CapCom report and for later notice (per Commonwealth regulation).
- In late-mid January, with relevant information in hand, CapCom prepares its draft report. Given the strong interrelationship between its recommended requests, funding sources and capacity, tax impacts and the like, CapCom drafts its report after relevant information is fully, or at least reasonably, gathered.
- In late January, after final review by its membership, CapCom issues its final annual report with recommendations, with original copy provided to the Select Board and FinCom at a joint meeting.

Note: This year, as in the past, Town capacity and resource issues led to a material number of requests being untimely or incomplete. To address late requests and maintain proper diligence, CapCom again modified its meeting schedules, repeatedly, extending its request-related review schedule with forbearance; this rescheduling impacted other review duties such as the depth of out-year and capital project status updates. To be clear, Town capacity and resource issues are not the fault of any particular party but rather, they are the result of Town growing pains which require proactive and ongoing measures (including as provided in our Recommendations that follow) to quickly mature the Town's capital asset management practices.

• Other Communication & Planning:

- *Committee Updates.* CapCom affirms the utility of Select Board and FinCom receiving updates on material matters as reported by their respective CapCom

January 23, 2020 Page 8 of 12

STATEMENT OF PROCEDURES

representative during the Committee Update section of regular meetings.

Note: In attempt to regularize committee reporting for CapCom's Select Board, Finance Committee and NP&EDC members, an information transmittal sheet (the "Green Sheet") was attempted early in this budgeting cycle but was found wanting; alternatives are addressed in the following recommendations. Also, subject to development of database reporting capability, important information (e.g. projects, by year or otherwise; prior appropriations and expenditures to-date; project status, CapCom review status, etc.) can be readily accessible to Select Board and FinCom at the click of mouse, through a secure portal. Still, CapCom anticipates targeted future use of Green Sheets to convey timely information on topics such as Funding Capacity, Capital Reserves, etc.

- Department Liaisons. Ordinarily, CapCom designees serve as liaisons to departments to review current and out-year capital requests in situ, to develop a thorough understanding of department needs for insight during CapCom deliberation, and to observe capital maintenance and other reasonable concerns. As a result of CapCom composition (which includes a member from each of the Finance Committee, the Select Board, and the Nantucket Planning & Economic Development Commission), the exercise is also intended to provide a degree of insight to integrational planning. However, during this budgeting cycle, CapCom liaison involvement was not activated by Town Administration. CapCom reaffirms the importance of department liaisons.
- *Joint Meetings.* After in-depth discussion, CapCom determined by unanimous consent that a joint meeting (of the entirety of the CapCom, the Select Board, and FinCom) held annually, at the beginning of the capital budgeting cycle, will help all parties to refocus as a group on capital projects and related budget matters; this, with insights of the Town Manager and Finance Director. The CapCom determined too, that joint meetings at or near the tail-end of the capital budgeting cycle, to summarize capital requests likely to be recommended for funding in the upcoming fiscal year (with CapCom's report and recommendations nearly imminent) offer no measurable benefit—bit of a bust—and that this type of information sharing could, and should for various reasons, be accomplished in other ways. (See Statement of Procedures: "Committee Updates" and "Strategic Integrated Planning Sessions".)
- Strategic Integrated Planning Sessions (SIPS). This year, to help broaden decision-maker and advisor communications, and to provide an opportunity for discussion on emergent capital-related matters with some perspective on 'Causes of The Day', CapCom suggested and initiated SIPS with thanks to the Town Manager. Matters addressed or discussed to-date have been regarding i) Town Meeting Article guidance for citizens, including a Q&A format revision regards financial and social costs and related impacts and benefits, ii) discussion around the "Bear of a Task" engaging stakeholders and constituents such that they are informed about important capital expenditures, and iii) other matters not ordinarily addressed without group support. These sessions are intended to occur during the capital budgeting cycle; continuance of these sessions should be fruitful, but best if agenda-driven and brief.

January 23, 2020 Page 9 of 12

PROCEDURAL RECOMMENDATIONS

CAPCOM AFFIRMS PRIOR YEAR COMMENTS & RECOMMENDATIONS

The Town's aging and lack of essential infrastructure and equipment require appropriate capital purchase, maintenance, and replacement while our rapidly growing year-round and seasonal population provides constant pressure on the Town to expand capital infrastructure and inventory. Not widely factored, currently, are costs to build our community's coastal resiliency and determine timely, adequate hazard mitigation measures; these remain relatively new concerns in response to changes to our natural environment. Whether it is more frequent severe storms or coastal flooding, or other hazards, the Town and community recognize the need to protect our built and natural resources by adaptation, mitigation, and other means; of course, these protections come at a cost. As a result of these circumstances, the Town's capital needs are projected to increase in a relatively dramatic fashion for a sustained period. Faced with these challenges and the associated expenses, and the stewardship of responsible governance, a robust and effective CIP remains essential. Essential too, is highly-effective management of capital assets as exist, and that are acquired or constructed. Professional fiscal management objectives of the Town's FP&P lay the groundwork; faced with these growing pains, including as a result of effects from the natural world, our shortcoming is capacity. In conjunction with existing programming, in keeping with the intent of objectives under the FP&P, to help develop the CIP-process to its intended capacity, and in the interest of smoothing the capital planning process and its impacts, we make the following recommendations:

- Annual Process Timeline. Continue to reevaluate and adjust information-gathering schedules and procedures as necessary to help ensure completion of CapCom's actions as required under the FP&P.
- Biennial Procedure CIP Capacity & Funding Analysis. To reasonably inform CapCom recommendations, biennially model the 10-year CIP to include a 5-year outlook of revenue and expenditure projections (including sub-reports for debt burden, prospective debt issuance, and other relevant metrics), with results presented to CapCom; it is understood and acknowledged that the Town's Finance Director performs more regular, shorter-term modeling of this nature. (See too, Development of Reliable 10-Year Capital Improvement Plan (CIP) below.)
- Biannual Procedure Capital Project Status Reporting. Better develop current biannual reporting sessions to monitor approved requests (to include expenditures to-date, the necessity for supplemental funds, scheduling exceptions, and discontinuances of projects or any severe problems, if any) to help identify capital planning shortfalls; foregoing, drawing on an active, readily accessible list of past years projects and their status.
- System-wide Capacity Centralize Capital Asset Management. A result of growing pains, the Town's capital asset management is fractured in various regards and important tasks are regularly subject to competing priorities; these circumstances undermine capital programming proficiency and form obstacles to timely and cost effective deliverables. Even simpler request and reporting duties are impaired. With too limited capacity and resources, reasonably comprehensive management of the Town's existing and rapidly expanding capital inventory is unrealistic. These and other negative effects will worsen as

January 23, 2020 Page 10 of 12

PROCEDURAL RECOMMENDATIONS

the number, cost, and complexity of capital projects increase. Action is required; capital programming needs to be an ongoing process with appropriate resources. A common enterprise-level solution is centralized capital asset management, which streamlines capital programming, budgeting, and sustainment, leveraging dedicated resources to eliminate issues—such as the Town currently experiences—while preempting other issues and problems. This level of involvement and processing is also required for timely and informed decisions by leadership and to enhance performance of the Town's capital investments—to help ensure high-value returns to the community while helping constituents understand capital needs and the utility of improved community-wide resources.

Carefully developed and implemented, these recommendations create efficiency, savings, and needed relief, along with increased credibility among taxpayers, ratepayers, and others. While some of the recommendations involve procedural changes absorbable through longer-term scheduling of processes, others require funding to complete stated objectives. In all regards, CapCom suggests special attention is required to limit priority-related conflicts among and between Town staff and other resources, and more so during times of cyclical responsibility (e.g. preparation and presentation of the annual operating budget and for Town Meetings, etc.).

Note: The foregoing recommendations were addressed previously in CapCom's FY19 Report & Recommendations, in greater detail, and subsequently summarized (largely as above) in the CapCom's FY20 Report & Recommendations; inclusion within this FY21 Report & Recommendations is a strong affirmation of the Town's needs and CapCom's related recommendations, which by their nature are meant to identify and inspire related, important actions. In the face of quickly escalating capital investment requirements, if not yet made clear, there is a need to better equip current and future municipal leaders/decision makers with sufficient tools to act effectively, to enhance and protect the Town's capital assets, and realistically plan for Town's future,.

ADDITIONAL COMMENTS & RECOMMENDATIONS

- *Expansion of RORI*. See comment earlier in the body of the report, provided topically under Statement of Procedures: Prioritization & Ranking.
- Development of the Capital Project Request Form Relational Database. In 2017, CapCom undertook to overhaul the departmental-level capital request form, conceiving it as a portal of information to a comprehensive capital projects data-collection and program management tool. The request form interface is completed, providing various benefits, not the least of which is the elimination of duplicate data entry and minimization of potential human error. The database was/is intended to be an interactive repository of 'all things capital' (past, present, and 'likely future'), to provide collection and reporting efficiency and features not currently available. Regular reports with the potential to cover the entire capital planning process (from submission through financial analysis, ranking, funding source projection, to assist in rapid debt modeling, and to inform interested public bodies) can be developed and made accessible. Presently, while not disparaging efforts or advances to-date, the database is under early-stage development; capital request inputs.

CAPITAL PROGRAM COMMITTEE: FY21 REPORT & RECOMMENDATIONS (FINAL)

PROCEDURAL RECOMMENDATIONS

- RORI inputs and basic management, and relatively gross reporting capabilities are proofed and in use. Properly developed, the database solves for resource conflicts, freeing professional staff for other important tasks while providing timely information access. One of many important elements is to include capital-request-related personnel costs, using an efficient click-to-enter interface for reporting capabilities, to inform Town Manager /Finance Director, Select Board and FinCom budgetary reviews. Another is automated reports to the Select Board, and FinCom, including Prior Year Appropriations w/Expenditures To-date, and direct access to individual capital request forms. Department-level training and access is imperative.
- Review Town's Debt and Reserve Policy. (Self-explanatory.)
- Development of Reliable 10-Year Capital Improvement Plan (CIP). It is fair to state the current 10-year CIP is less a plan than it is a partial list of likely future capital projects. This state of affairs directly reflects the lack of capital programming capacity and resources within the Town. MA DOR advises a reasonably accurate 10-year CIP is required for adequate planning of municipal finances. And, facility and department-level equipment and infrastructure management plans, each based on well-developed and properly completed and maintained capital asset needs assessments, are essential to the successful development and efficient use of a municipality's 10-year CIP. Provided adequate resources, development of such a plan, focused for various utility to two 5-year increments, is obtainable and broadly beneficial. An updated version of the 10-year CIP was not available at the time of printing this report.

CapCom acknowledges its recommendations may seem ambitious and understands outcomes cannot happen overnight; still, we strongly support the Town's regular steps towards enterprise-level capital asset management practices—even small regular steps help to form a material outcome.

Given vision and resolve, the proficiency and effectiveness of the Town's Capital Management Program are limited only by the appropriateness of resources engaged in the endeavor; properly administered over time, dramatic savings—including to help fund the capital asset management program itself—may be realized.

PUBL-21-002	Loran Housing (SEWER) Connection of the Loran housing facility to the town sewer system	\$.5M	\$.5M	Include future-use capacity
PUBL-20-001	Public Safety Auxiliary Building Creation of an auxiliary building at the public safety complex. This would be used for storage and light maintenance by both the police and fire departments.	\$3.M	\$.M	High cost-to-use; however, investment is necessary to extend useful life of rolling stock; Recommended for FY21 fundingno funding source.
	School De	partment		
NPS-21-001	Bobcat Replacement This request is to replace the Bobcat for the Ground Department. The Bobcat was purchased used in 2004. It has had several mechanical issues over the past few years and now has been deemed unfixable. We use this equipment for many grounds functions including plowing, digging, moving large items and general maintenance.	\$.07M	\$.07M	
NPS-20-001	Campus Wide Improvement Plan We have an RFQ out for a Campus Wide Master Plan. The money for this study was approved in FY20. The plan will examine classroom space needs and athletic field placement as we plan for the future growth of our district. The plan is to request \$750,000 each year for Athletic Field Improvements as suggested by the pending master plan.	\$.75M	\$.75M	

Code	Dept./Request	FY21 Request	CapCom Rec.	CapCom - Comments of Note
	IT Infrastructure	•		
NPS-21-002	This request is to replace outdated servers and equipment which are imperative to our every day operations.	\$.15M	\$.15M	
NPS-21-003	NHS Boiler Replacement The NHS boilers themselves are original to the building which was constructed in 1990. They have been refurbished twice due to internal leaking, we are told the gaskets cannot be replaced again. We've also had a multitude of other issues with them this past winter. These two large boilers had a 25 year life, by this time next year they will be 30 years old. The burners were replaced 12 years ago.	\$.3M	\$.3M	
NPS-17-001	NPS Building Improvements This request is for building & grounds improvements for the Public Schools. The requested funding will include repairs to all school buildings. We know that this funding won't be sufficient for all repairs, but it will be help to get a great deal completed.	\$.3M	\$.3M	
	Town Admi	nistration		
HMP-21-006	Children's Beach Storm Water Pump (HMP ID #F9) Design and complete repairs to Children's Beach storm water pump and outfall to improve reliability and reduce/eliminate backflow into the pump and drainage system during high tides. This supports the drainage area of more than 150 acres.	\$3.3M	\$3.3M	
HMP-21-004	Fulling Mill Road (HMP ID #F10) Participate in a limited public-private partnership with Nantucket Engineering & Survey tom complete a study of the Fulling Mill Road Watershed, in particular the hydrologic conditions at Polpis Road, to identify design alternatives for improvements to this area.	\$.7M	\$.M	Consider FY22 subject to various additional information noting as proposed too high cost-to-value ratio
HMP-21-007	Harbor Master Building and Town Pier (Suppl.) Funding to supplement design/install wave attenuator	\$.2M	\$.M	Resolve into existing appropriation
ADMIN-21-002	Island-wide Underground Wiring Feasibility Study Feasibility study/assessment of town-wide or old historic district project to get all wires underground	\$.5M	\$.5M	Subject to context (Facilities Master Plan, Hazard Mitigation Plan, Coastal Resiliency, etc. and ¹
ADMIN-20-003	Town-wide Document Management System Costs associated with the continuation of an electronic document management system. project entails scanning, categorizing and archiving hard documents into a cloud based storage system.	\$.25M	\$.25M	
ADMIN-21-001	Town-wide Security Measures Assessment of security measures for municipal buildings with recommendations. 34K spent over the last few years for key card access implementation for various offices.	\$.1M	\$.1M	
	GENERAL FUND SUBTOTAL:	\$30.54M	\$20.04M	

¹ = CapCom: "Can TON require utility companies materially, in coordination with TON, i) underground utilities, and ii) contribute directly to related costs?" TON Counsel: "This falls under G.L. c.166, s.22D which allows the Town to pass a bylaw requiring utilities to bury exiting OH lines and to expend not less than 2% of preceding year gross revenues derived from Town customers for such undergrounding projects. Section 22M allows the utility to collect a surcharge from Town customers to cover these costs."

Note: With very minor exception, descriptions above are as submitted by respective department head.

Appendix C - Typical MA Municipal Capital Funding Sources

Local

1) Borrowing:

- a) **General Obligation Bonds (aka, "GO Bonds").** These are issued for a period of time ranging from 5 to 30 years, during which time principal and interest payments are made. Making payments over time has the advantage of allowing the capital expenditures to be amortized over the life of the project. Funding sources used to pay back the debt can include:
 - i) **Bonds funded within the tax limits of Proposition 2 ½**: Debt service for these bonds must be paid within the tax levy limitations of proposition 2 ½. Funds used for this debt must be carefully planned in order to not impact the annual operating budget.
 - ii) **Bonds funded outside the tax limits of Proposition 2** ½ -- **Debt Exclusion Bonds**¹: Debt service for these bonds is paid by increasing local property taxes in an amount needed to pay the annual debt service. Known as a Debt Exclusion, this type of funding requires_approval by 2/3 vote of the local appropriating authority (e.g., city council or town meeting) and approval of majority of voters participating in a ballot vote. Prior to the vote, the impact on the tax rate must be determined so voters can understand the financial implications.
 - iii) **Bonds funded with Enterprise Funds:** Debt service for these bonds is typically paid by user *fees*, such as water and sewer revenue. Depending upon the type of project, interest costs may be subsidized by the Commonwealth and at times partial grant funds may be available (see below). Enterprise funds do not affect the general operating budget unless general funds are needed to subsidize revenues from the enterprise. Prior to the issuance of debt, the projects must be analyzed for their impact on rates.
- b) **Capital Exclusion:** Capital Exclusion projects are similar to Direct Appropriation (Pay-as-You-Go, below) except taxes are raised outside the limits of Proposition 2 ½ and are added to the tax levy only during the year in which the project is being funded. As with a Debt Exclusion, Capital Exclusion funding requires approval by 2/3 vote of the local appropriating authority (e.g., city council or town meeting) and approval of a majority of voters participating in a ballot vote. Prior to the vote, the impact on the tax rate must be determined so voters can understand the financial implications. Capital Exclusions may be authorized for any municipal purpose for which the city or town would be authorized to borrow money.
- ¹ = Debt Exclusion is different from a property tax override in that an exclusion is temporary, it is only in place until the incurred debt is paid. An override becomes a permanent part of the levy limit base.

2) **Other:**

- a) **Bond Proceeds:** Municipalities sell bonds at a premium over par, which premium funds bond issuance and service; any excess is reserved for specific uses based on the type of account (General Fund, Enterprise Fund, or School) with that excess available to fund like capital projects.
- b) **Free Cash:** Free Cash is the difference between annual revenues and expenditures and is certified by the Commonwealth each year. After certification, free cash is available for appropriation for any municipal purpose, including capital projects.
- c) **Direct Appropriation/ Pay-as-You-Go:** Direct Appropriation capital projects are funded with current revenues, and the entire cost is paid off within one year so no borrowing takes place. Projects funded with current revenues are customarily lower in cost than those funded by general obligation bonds because there are no interest costs. However, funds to be used for this purpose must be carefully planned in order to not impact the annual operating budget. For this reason, Pay-as-You-Go capital projects are typically lower in value than projects funded by borrowing.
- d) **Sale of Surplus Real Property:** Pursuant to Massachusetts General Laws, when real estate is sold, the proceeds must first be used to pay any debt incurred in the purchase of the property. If no debt is outstanding, the funds "may be used for any purpose or purposes for which the city, town or district is authorized to incur debt for a period of five years or more...except that the proceeds of a sale in excess

of five hundred dollars of any park land by a city, town, or district shall be used only by said city, town, or district for acquisition of land for park purposes or for capital improvements to park land" (MGL Chapter 44, Sec. 63).

e) Stabilization Fund:

- i) **Capital Stabilization Fund:** Local officials can set aside money in a stabilization fund -outside of the general fund- to pay for all or a portion of future capital projects. A 2/3 vote of city council or town meeting is required to appropriate money into and out of this fund.
- ii) **Enterprise Retained Earnings (as a form of Stabilization Fund):** Enterprise operations, such as water and sewer, are able to maintain an operating surplus that can be utilized for future enterprise fund costs. These funds can be used to stabilize the user rates, apply to annual budget needs, and/or invest in capital replacement and expansion.
- f) **Special Purpose Funds:** Communities also have established numerous "Special Purpose Funds" for which the use is restricted to a specific purpose, some of which may be investment in department facilities and equipment. Numerous state statutes that govern the establishment and use of these separate accounts. Examples include the sale of cemetery lots and off-street parking fees accounts.

Federal, State, and Private Grants and Loans

- 1) Office of Aviation Airport Improvement Program (AIP): Funding is available to airports that are part of the National Plan of Integrated Airport Systems by the FAA. The AIP provides funds for projects to improve infrastructure, including runways, taxiways, aprons, noise control, land purchases, navigational aids, safety and security.
- 2) Massachusetts Chapter 90 Roadway Funds: Each year, the Massachusetts Department of Transportation (MassDOT) allocates funds to cities and towns for roadway construction, maintenance, or improvement. Funds may also be used for other work incidental to roadway work, such as the construction of a garage to house related vehicles, or the purchase of related vehicles, equipment, and tools. Chapter 90 is a 100% reimbursable program. Funding is accomplished through the issuance of transportation bonds and apportioned to municipalities based on three factors: 1) accepted road miles, 2) population, and 3} total employment within the municipal borders. The number of accepted road miles is the most heavily weighted factor at 58.33%; the others are each weighted at 20.83%.
- 3) Massachusetts Department of Environmental Protection's State Revolving Funds (SRF): The Clean Water State Revolving Fund (CWSRF) provides financing for sewer and drainage projects intended to reduce sewer overflows and the Drinking Water State Revolving Fund (DWSRF) provides financing to improve the quality of the drinking water system. The CWSRF and DWSRF programs typically offer a mix of low interest (2%) loans and grant funds. Repayment does not begin until two years after the monies have been borrowed.
- 4) **Massachusetts School Building Authority (MSBA):** The MSBA provides funding for school feasibility, design, and construction. Projects must be accepted into the process in response to the submission of a Statement of Interest which identifies a facility problem to be solved. Subsequently, the community must appropriate funding for schematic design and later for construction before the MSBA will commit to its share of the project. If accepted, the MSBA determines the amount of reimbursement it will offer based upon community need, with a minimum base rate of 31%. The percent of reimbursement can then be increased based upon three factors: community income factor, community property wealth factor, and community poverty factor.
- 5) **Mass DOT Complete Streets.** Funding program that allows up to \$400,000 in construction funds.
- 6) **MA Community Compact Grants** (fit in where/how?)... eg. funds upwards of \$68,000 for a particular MA town's IT equipment.
- 7) **MA Other.** Many Commonwealth departments also offer annual grant opportunities that are available to municipalities typically through a competitive application process. State grant programs that may be used for capital expenses include, but are not limited to the Green Community grants (project to improve sustainability) and Parkland Acquisitions and Renovations for Communities (PARC) grants.

Appendix D - Town of Nantucket Tax Rate History

Rate
\$73.00

			PROJEC	T INTRODUC	TION			
Department:						;	Submittal Date:	
Project Title:						C	ontact Person:	
Project Summary:								
Project Location:								
Project related to other depts/agencies	s, explain:							
			CLA	SSIFICATION				
Type: (Check all applicable)						Nature: (Check all appliable)	
Land or Land Improvements						New	Assetif new operation too	ວ, explain:
Building or Building Improvement	i					Upgi	rade/Improvement	
Infrastructure						Repl	lacement	
Outdoor Asset (park, playing field	ls, etc.)					Ren	ovate/Repair	
Soft Cost (design, study, plans, p	-,						ommissioning	
Vehicles (on or off-road, specialty						Herit	tage/Culture/Legacy/Traditi	on
Equipment, Machinery, Fixture, F	,	- ,	1			Puro	chase	
Intangible (software, other license	es, permits, o	covenants)				Leas	ie .	
			PRI	ORITIZATION				
Low/Elective - Dept quality or fun	ctional enha	uncement if fun	dina permite		Г	If not funded A	Alternative Action available-	explain·
Med./Recommended - Dept nece					L			олр.ш
High/Required - Dept mission crit	-		охрішії.					
(Check all applicable)								
Imminent threat to public	safety or pro	perty, explain:						
Preservation of operation	s							
Legal requirement of Fed	eral, State o	r Local agencie	es					
Improvement to infrastruc		· ·						
Improvement in the efficie	ency and effe	ectiveness of s	ervice delivery	y, explain:				
Minor		Major						
Alleviation of an overstres	sed/overbur		n					
Supports strategic plan (i.	.e. master pl	an, housing pr	od. plan, facili	ties maint plan	, CWMP, etc.)			
Results in lower energy co	onsumption		•	·	,			
Results in lower operation	ns and maint	tenance costs						
Phased funding/included								
Scheduled replacement (i	i.e. motor ve	hicles, roofs, c	omputers)					
Placeholder explain:			, ,					
			cos	TS & FUNDING	3			
Basis for Cost:					-			
Source of Quote or Estimate:								
Informal (name source):								
Comparable Valuation Historic Reference								
Other explain:								
Quote (written)								
Bid
